Professional Summary

Backend-focused web developer with a strong foundation in JavaScript and recent graduation from Austin Coding Academy's Full Stack Program. Proven ability to quickly learn and apply new technologies, with a solid understanding of React, C#, Python, JavaScript, and development tools such as VS Code, Visual Studio and Unity.

Technical Skills

- Languages & Frameworks: React, JavaScript, C#, Python, HTML5, CSS, MySQL
- Tools: VS Code, Visual Studio, Unity, Git, GitHub, ChatGPT

Professional Experience

Backend Developer Intern

Ripple Learning LLC, Austin, TX
September 2023 – Present

- Developed a Job Application Tracking Web Application using React, Python, Javascript, and mySQL
- Structured and managed user databases for tracking job applications including database administration and querying responsibilities. I set up and maintained the system that allowed resumes to be stored by users.
  - Additionally fixed a bug where the database would not delete previous resumes when a new one was uploaded and caused the database to have more data that 1. was not needed and 2. the user could not access. Once the bug was resolved, the resume upload system worked as intended without any loss of performance.
  - I was additionally responsible for creating the mySQL queries for the database system which included creation of user data tables upon a successful registration, and the subsequent use and updating of said user data table fields. I connected the front end entry forms to submit data to the backend database, allowing us to fully test and continue work on the functionality of the web application.
- Implemented login functionality using Auth0 to let users track applied jobs and save their resume to their profile to let the web application determine how their resume matched up with the jobs that users applied to.
- Wrote APIs that interface with the backend data store (mySQL)

Hardware Support Specialist for PlayStation (Contract)

Sitel Group, Orem, UT
September 2021 – April 2022

- Provided hardware support for PS5 on the PlayStation Contract Project's support team.

FC Warehouse Associate

Amazon.com, Salt Lake City, UT
September 2020 – August 2021

- Trained new hires and cross-trained warehouse associates.
- Operated select robotic systems on the warehouse floor.

Captioning Agent

CaptionCall, Orem, UT
April 2020 – September 2020

- Captioned phone calls for individuals with impaired hearing, ensuring clear and accurate communication.

Education

Full Stack JavaScript Application Development Program

Austin Coding Academy, Austin, TX
Certificate of Course Completion, November 2022 – August 2023

College Course work in General Requirements and Computer Science Prerequisites

Utah Valley University, Orem, UT
August 2020 – June 2021

Green River Community College, Auburn, WA
August 2017 – May 2019
